Try Coding Workshop

Thinking of changing careers?
Software development could be a stable and lucrative career path for you!

Try it out at a full day workshop, designed for beginners, to learn the basics of Back-End Engineering. The instructor will walk you through the basics of writing code and you will work on your own code project. You'll also learn more about how you can turn an interest in coding into your next career move.

When:

- Wednesday, April 1, 2020
- 10:00am - 4:30pm

Where:

- Arapahoe/Douglas Works!
  Workforce Center | Parker Room
  6974 S. Lima Street
  Centennial, CO 80112

HOW TO PARTICIPATE

Complete the registration form:

http://bit.ly/2O7qzDf

Space is limited! Participants will be chosen based off of responses to registration form.

Why me?

Not sure if this workshop is for you?

- Anyone can learn how to code! A diploma or degree is not required to become a software developer. It will take training, dedication and hard work to become one.
- Software development is about solving problems, puzzles, logic and attention to detail. If that sounds like you, check this workshop out!
- Turing School graduates earn an average of $75,000 their first job out of the program. The tech industry is growing and so are opportunities to work in tech.

Did you know?

- In the U.S. there are over 500,000 open tech jobs and this year that number is expected to grow to over 1 million. Over 60% of new coders, software engineers and data scientists are emerging from technical training programs (like the Turing School of Software & Design) and industry-current vocational schools.
- Turing is a **nonprofit**. That means that everything we do is designed with one goal: to **prepare students for a thriving career in tech**.
